Dear Colleagues:

On behalf of the 2008 International Union Against Tuberculosis and Lung Disease - North American Region Planning Committee, we are pleased to welcome you to our annual conference. This year's theme is "Tuberculosis: A Disease Without Borders". At this conference we will work to build partnerships and collaborations that extend beyond the North American Region. By linking with our Latin American Partners we will be able to enhance our border/tri-national relationships for the prevention and control of tuberculosis. This year we are partnering with the California Tuberculosis Controllers Association. This joint meeting will afford us an opportunity to build linkages that are binational with Latin America, research focused, and community based. We will be part of the global inauguration of the Stop TB US organization. Coalition building and advocacy will be the core of the STOP TB US movement. The Nursing Assembly, as always, promises to engage and challenge us to stay the course of tuberculosis prevention and control. This will be an exciting program that will bring us face to face with tuberculosis prevention and control activities from around the globe. We welcome you to San Diego and the North American Regional meeting. We hope you will find this conference an exciting and challenging experience.

Dr. Charles Wallace
Program Chair, IUATLD-NAR

This conference is dedicated to the memory of Dr. George Comstock
